EASYSTEP

INNOVATIVE 2-in-1 SOLUTION

EASYSTEP SPECIFICATIONS

Capacity	400kg
Speed	0.06m/sec
Size	900L x 700/800/900/1000W mm
Lifting height	Up to 1250mm
Power	Single Phase
Minimal builders works	
Award winning	
Danish designed and manufactured	
Freestanding design	
Safety features: Battery backup which allows the EasyStep to operate during mains power failure. Infrared movement and sensor alarm.	

A staircase and lift combined into just one product.... now that's easy living!

Free standing design means that no structural alterations are required on site, all that's required is a level floor. No need for a separate machine room as everything is self-contained, allowing for a wider choice in positioning the location of the lift.
Ideal for both residential and public areas.

The EasyStep is designed as the most space saving platform lift on the market, satisfying growing accessibility needs.

easy living™ platform lifts
access for all...
